Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 12-28 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kato (5,854,159), for reasons of record.
3. Claims 12-28 are rejected under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Niwa et al (2003/0008765) and Alford et al (6,680,268), each taken alone, for reasons of record.

Applicants' argument that Kato, Niwa and Alford fail to teach the starting materials and/or process steps used to manufacture the CLAIMED ceramic member is not persuasive in overcoming the rejections. Applicants must patentably distinguish the CLAIMED member and not the process steps used to manufacture the member or the starting materials used in manufacturing the ceramic member. The prior art references teach high purity alumina members not unlike that claimed.

"The patentability of a product does not depend upon its method of production. If the product in [a] product-by-process claim is the same as or obvious from a product of the prior art, [then] the claim is unpatentable even though the prior [art] product was made by a different process." In re Thorpe, 227 USPQ 964, 966 (Fed. Cir. 1985) (citations omitted). Once the examiner provides a rationale tending to show that the claimed product appears to be the same or similar to that of the prior art, although produced by a different process, the burden shifts to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product. In re Marosi, 218 USPQ 289, 292 (Fed. Cir. 1983).

Even though different process steps may or may not be used in manufacturing the claimed article, applicants must patentably distinguish the article not the process.

Art Unit: 1755

Applicants are attempting to define patentability of the claimed ceramic member by the method of manufacturing the starting material used to make the member. It is not clear how the method of making the starting material or the starting material, distinguishes the claimed member from the alumina members in the prior art.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
